Worksheet - Safe Use of Medication

Aim: Understand the general purpose of using medications and how to use them safely.

Objectives:

1. Understand the purpose of taking medications and how to use them correctly.
2. Distinguish the difference between pharmacies and other medicine stores that sell medication.

A 1. Expiry

A 2. Package

B1. Pain killer (e.g. Panadol) is used to treat diseases.

B2. Influenza vaccination can lower the chance of having a flu infection.

C.

A. Please fill in the blank.

Anson found a bottle of eye-drop in his drawer. He just learnt from school that there is an ex_ _ _ _ date after opening, which is different from the date stated on the box before opening. He then checked the p_ _ kage insert to confirm.

B. Is the following sentences correct? Put a tick or a cross in the box.

1. Pain killer (e.g. Panadol) is used to treat diseases.

2. Influenza vaccination can lower the chance of having a flu infection.

C. Which of the following logo is limited to registered pharmacies in Hong Kong? Circle the correct answer.
